

التربية العلمية

ثم اربطه بنوع تكاثره:

The image shows four stages of a seedling's growth from soil, labeled 1, 2, 3, and 4. In each stage, a green seedling with two leaves is shown emerging from a brown soil surface. The taproot is visible below the soil. In stage 1, the taproot is long and thin. In stage 2, it is shorter and thicker. In stage 3, it is very short and thick. In stage 4, it is very short and thick.
