

الإِفْقَاحُ يَتِمُّ جِسْمُ الْإُنْثَى.

A diagram of an egg cell with several labeled parts. The outermost layer is the cell membrane. Inside, there is a large, clear area representing the cytoplasm. A smaller, circular structure in the center is the nucleus. Within the nucleus, there is a dense, oval-shaped structure representing the nucleolus. A small, dark, oval-shaped structure is also visible in the cytoplasm, representing a mitochondrion. Arrows point from the labels to these structures: 'Cell membrane' points to the outer boundary, 'Cytoplasm' points to the clear area, 'Nucleus' points to the central circle, 'Nucleolus' points to the dense structure inside the nucleus, and 'Mitochondrion' points to the dark oval in the cytoplasm.

(مِدْفَاةٌ كَهْرَبَائِيَّةٌ . مِصْبَاحُ النَّيُّونِ . آلَةٌ حَاسِبَةٌ . غَسَّالَةٌ . سَاعَةٌ حَائِطٌ . مِصْبَاحُ الْيَدِ . حَاسُوبٌ . جِهَازٌ تَحَكُّمٍ عَنِ بُعْدٍ . هَاتِفٌ مَحْمُولٌ . مُكَيِّفُ هَوَاءٍ)
