<u>Mock Exam</u> <u>Subject 1</u>		

Part One: Reading (15 points) **Read the text carefully and do the activities.**

Child labor refers to the exploitation of children through any form of work that deprives them of their childhood, interferes with **their** ability to attend regular schools, and is mentally, physically, socially, or morally harmful. **It** is a global concern that affects millions of children worldwide. Child labor can have severe consequences on children's health, education, and overall development. (1§)

Child labor exists for various reasons, including poverty, lack of access to quality education, and the demand for cheap labor. Children engaged in labor-intensive industries often work in hazardous conditions, such as agriculture, mining, and manufacturing. These circumstances can lead to physical injuries, emotional trauma, and hinder their chances of breaking the cycle of poverty. (2§)

Efforts to combat child labor have been made globally. International organizations, governments, and NGOs are working together to raise awareness, enforce laws, and provide support to affected children and their families. Education plays a crucial role in addressing child labor, as **it** empowers children to break free from the cycle of poverty and provides them with opportunities for a better future. (3§)

The first trip to the Moon was a monumental achievement for humanity. On July 20, 1969, the Apollo 11 mission successfully landed astronauts Neil Armstrong and Buzz Aldrin on the lunar surface. **This** historic event marked the culmination of years of scientific research, technological advancements, and the unwavering determination of the entire Apollo team. As Neil Armstrong famously said, "That's one small step for man, one giant leap for mankind." **(1§)**

The Apollo 11 mission was made possible by a series of carefully planned and executed steps. **It** began with the launch of the Saturn V rocket from Kennedy Space Center in Florida. The spacecraft traveled approximately 240,000 miles to reach the Moon. Once in lunar orbit, the lunar module, named Eagle, separated from the command module, Columbia. Neil Armstrong and Buzz Aldrin descended to the Moon's surface in the lunar module, becoming the first humans to set foot on another celestial body. **(2§)**

The first trip to the Moon had a profound impact on science, technology, and our understanding of the universe. It opened up new possibilities for space exploration and inspired generations of scientists, engineers, and dreamers. The Apollo program not only achieved the goal of landing humans on the Moon but **it** also paved the way for future space missions and discoveries. The legacy of the first trip to the Moon continues to inspire us to push the boundaries of what is possible and to explore the wonders of our universe. **(3§)**
