
Series of practical exercises 1

Exercise 1:

1. Make a web page with a paragraph with text "Hello World" and a button with text "Click me",
2. Write a script for the button click that changes the paragraph text to "Bonjour"

Exercise 2:

```
1  <!DOCTYPE html>
2  <html>
3    <body>
4      <table id="sampleTable" border="1">
5        <tr><td>Row1 cell1</td><td>Row1 cell2</td></tr>
6        <tr><td>Row2 cell1</td><td>Row2 cell2</td></tr>
7      </table>
8      <br>
9      <input type="button" onclick="insert_row_b()" value="Insert row at
      beginning">
10     <br>
11     <input type="button" onclick="insert_row_e()" value="Insert row at end">
12   </body>
13 </html>
```

Use javascript code to insert rows at the beginning and the end of the table.
